KeyMaster's Learning Lights Keyboard is a fun and innovative way to encourage students to key by touch. With these keyboards, I'm able to hide key lettering, taking away the temptation to look at one's fingers while typing. They improve student's typing speed and accuracy, and it helps them memorize the keyboard. I'm able to tailor learning to each student by turning on or off specific keys. I'm also in need of a color printer as I need to print things off for student learning.

Describe how this project will enhance student learning (limit 500 characters):

This grant will benefit 75 students in the 3 Kindergarten classes at Measer Elementary in our phonics/reading/writing instruction by allowing students to actively manipulate sounds and words, along with giving them practice writing the words in a time-saving manner. This will allow us to make the most of our precious time with students and will merge perfectly into our district curriculum. The kits are durable and will last for years benefiting untold numbers of students. <https://phonicskit.com>

Describe how this project will enhance student learning (limit 500 characters):

Our 4th grade Science Core studies geology and the study of rocks. A rock tumbler (rock polishing) combines STEM education, geology, and engineering. It's a great way to explore earth science. A rock tumbler can help explain the process of weathering and erosion. We will take rough rocks and smooth them into polished stones using the same process that has worked in the ocean for millions of years.
